“Organisations participating in the 2020 Global Benchmark represent millions of employees in over 100 countries worldwide and we applaud their engagement!” said David Pollard, Executive Director, Workplace Pride. “Particularly in these very challenging times for everyone, these employers are in a unique position to influence cultural change not just within their own walls, but also with governments and in the communities and countries in which they operate”. 
The Workplace Pride Global Benchmark was first released in 2014 as an annually recurring survey that allows participants to track their progress. It has been developed under the leadership of Workplace Pride and with the support of the University of Leiden and major employers and NGOs from several different countries.

The Benchmark represents the ideal of LGBTI workplace inclusion around the world and is designed to provide management the data to measure, and thereby improve, LGBT workplace inclusion in their organisations, wherever they are. Each participating organisation receives a detailed overview of their progress broken down into the following 8 categories: Policy and Communication, Employee Networks, Workplace Awareness, Support & Benefits, Inclusion and Engagement, Expertise & Monitoring, Business and Supplier Engagement, Impact on Society.
